Title: **Idea Pitching "Share Your Flair"**
Description: **Project for Benefiting the World**

1. Introduction

1.1. Thank you for the opportunity to share about my project again

1.2. Introduce yourself

1.3. About our voices

Everyone has their flair that is different to anyone else.

You only need to look at how we choose our clothe & then what goes through our minds when we want to wear it & personalise it in order to express exactly how we feel.

1.4. Project Overview

My project is called "Share Your Flair" and it aims to inspire & assist anyone who wishes to share their findings & personal experiences about living God's Way & about God, with the rest of the world. If many would choose to engage in their passion & share verified information with the world about God, many new people will hear these voices, a huge change can come about and a lot of people will be attracted to find God.

1.5. Project Goal

This project will be an online & offline resource to offer to people, and will contain my experiences with documentation & education about what is involved in a process that starts from "having an idea" and leads to "sharing a verified data" with others.

I will offer this resource directly to public via my personal website in a document, audio & video formats as well as in person workshops.

1.6. Long Term Goal

My long-term vision is to not only see individual experiences about God shared by many others independently but also have this validated information come to one place where anyone interested in truth about any matter can come & check it out. So, having validated data submitted in a clear & thorough format will assist that idea.
